FOR IMMEDIATE RELEASE:

Cleaning Technologies Group, LLC introduces new cleaning solutions at PMTS / PCx 2019

February 2019 – Cincinnati, OH

Cleaning Technologies Group a world leader in providing cleaning and waste minimization technologies will introduce a host of advanced cleaning solutions at the PMTS / PCx 2019 in Cleveland Ohio April 2 - 4, 2019. Visitors to Cleaning Technologies Group Booth #11075 will be introduced to a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **[New LeanJet® RB-1 Cleaning System](#)** uses a patented washing and rinsing process of agitation, spray impingement, hydraulic purging through immersion and rotation, ultrasonics, and heated blow-off drying. The patented "triple action" batch cleaning process was developed specifically to process a broad range of challenging parts, especially those with internal bores and passages and complex geometries, making this system capable of meeting critical cleaning expectations.

The new LeanJet RB-1 parts washer also features the latest Siemens programmable controller and operator interface screen. This controls platform boosts system flexibility for automation integration, process control and data logging while offering an intuitive user interface. The new RB-1 has many enhancements for easy maintenance such as larger access doors, larger tank access lids, bolt on air knife and more. The new RB-1 has a small foot print of 4ft. wide x 7ft. deep x 6.6 ft. height.

[LeanJet Cell-Jet:](#) An excellent cabinet washer for point of use, as well as batch cleaning where very little floor space is available. This spray washer was designed as a low cost, down and dirty, industrial quality wash station utilizing medium pressure spray impingement and compressed air to clean and dry your parts.

At the show we will have technical experts available to explain our technologies in more depth and provide suggestions to our customers to improve their cleaning processes.
