## FOR IMMEDIATE RELEASE:

### Blackstone-NEY Ultrasonics introduces new cleaning solutions at MDM East 2015

May 2015 – Cincinnati, OH

Blackstone-NEY Ultrasonics a world leader in providing cleaning and waste minimization technologies will introduce a host of advanced cleaning solutions at the MDM East 2015 in New York, New York June 9 - 11, 2015. Visitors to Blackstone-NEY Ultrasonics Booth #1660 will be introduced to a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **The New Blackstone-NEY Ultrasonics Modular Aquarius® Cleaning System** is an innovation in aqueous parts cleaning, offering a modular plug & play configuration Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that can easily be integrated together to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide exactly the cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies 40, 72, 104 kHz in each tank, Siemens controller, automated hoist transfer system and much more. Additional modules can be added at any time allowing for future expandability. while offering an intuitive user interface

- **PROHT Sonic Tank** also known as the "Benchtop Series" is an entry-level benchtop ultrasonic cleaning system made of all stainless steel construction. Available in various sizes and intended to sit easily on a workbench or as a drop-in, these parts washers offer the same cleaning capabilities as the more elaborate models but at a lower price. They are great for cleaning small parts on an intermittent to semi-production basis but are not recommended for high volume cleaning. These tanks are available for use with single or multi-frequency generators.

At the show we will have technical experts available to explain our technologies in more depth and provide suggestions to our customers to improve their cleaning processes.
