FOR IMMEDIATE RELEASE:

BLACKSTONE-NEY ULTRASONICS INTRODUCES NEW CLEANING SOLUTIONS AT INTERPHEX

October 2015 – Cincinnati, OH

Blackstone-NEY Ultrasonics, a recognized leader in ultrasonic technology, will introduce a host of advanced cleaning solutions at the INTERPHEX 2015 in San Juan, Puerto Rico October 15 - 16, 2015. Visitors to Blackstone-NEY Ultrasonics Booth 221 will be introduced to a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

The New Blackstone-NEY Ultrasonics Modular Aquarius™ Cleaning System is an innovation in aqueous parts cleaning, offering a modular plug & play configuration Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that can easily be integrated together to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide exactly the cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies 40, 72, 104 kHz in each tank, Siemens controller, automated hoist transfer system and much more. Additional modules can be added at any time allowing for future expandability.

- **Multi-Frequency Ultrasonic Cleaning System** is an [ultrasonic cleaning system](#) made of all stainless steel construction. The Multi-Frequency Ultrasonic Cleaning System is great for cleaning small parts on an intermittent to semi-production basis but is not recommended for high volume cleaning. These tanks are available for use with single or multi-frequency generators. Blackstone-NEY Ultrasonics is a recognized leader in ultrasonic generator technology. Starting with the introduction of sweeping frequency in 1988, there has been a continuous stream of development and patents covering new ultrasonic generator and transducer technology from Blackstone-NEY Ultrasonics.

At the show we will have technical experts available to explain our technologies in more depth and provide suggestions to our customers to improve their cleaning processes.
