## **Blackstone-NEY Ultrasonics to Showcase Multi-Frequency Ultrasonic Cleaning System at IMTS 2024**

June 11, 2024 – Jamestown, NY

Blackstone-NEY Ultrasonics, a pioneer in ultrasonic cleaning technology, is excited to announce the display of its innovative Multi-Frequency Ultrasonic Cleaning System at the upcoming International Manufacturing Technology Show (IMTS), scheduled from September 9 to 14, 2024. Visitors can experience this cutting-edge cleaning solution firsthand at Booth 338774.

Designed for versatility and efficiency, the Multi-Frequency Ultrasonic Cleaning System boasts an all stainless-steel construction, ensuring durability and reliability in various industrial environments. This system is specifically tailored for cleaning small parts on an intermittent to semi-production basis, offering exceptional performance and precision.

Unlike traditional cleaning methods, the Multi-Frequency Ultrasonic Cleaning System utilizes advanced technology to deliver superior cleaning results without compromising on quality. Whether used for intricate components or delicate parts, this system is equipped to meet the most demanding cleaning requirements.

Blackstone-NEY Ultrasonics has a long-standing reputation as a leader in ultrasonic generator technology. Since introducing sweeping frequency in 1988, the company has continuously pushed the boundaries of ultrasonic innovation, resulting in a portfolio of patented technologies and cutting-edge solutions.

Visit Booth 338774 at IMTS 2024 to discover how the Multi-Frequency Ultrasonic Cleaning System from Blackstone-NEY Ultrasonics can revolutionize your cleaning processes.
