BLACKSTONE-NEY ULTRASONICS INTRODUCES NEW CLEANING SOLUTIONS AT IMTS 2024

Jamestown, NY July 10, 2024

Blackstone-NEY Ultrasonics, a division of Cleaning Technologies Group and a global leader in cleaning and waste minimization technologies, is set to unveil a range of cutting-edge cleaning solutions at IMTS 2024 in Chicago, Illinois, from September 9 to 14, 2024. The event will be hosted at Booth #338744 by Cleaning Technologies Group, where attendees will have the opportunity to explore several innovative products, technologies, and services.

Among the key highlights of the exhibition is the introduction of the Aquarius Series Multi-Tank Ultrasonic Cleaning Systems. These systems integrate ultrasonic cleaning with rinsing, drying, and other processing steps within a unified cleaning console, ensuring robust process integrity. Featuring automated robotic transfer capabilities, environmental enclosures, and DI water systems, the Aquarius Series enhances cleanliness levels, ensures process consistency, and notably reduces labor requirements for parts cleaning.

"The Aquarius Series represents a significant advancement in our commitment to delivering efficient and effective cleaning solutions," said a spokesperson for Blackstone-NEY Ultrasonics. "These systems are engineered to address diverse parts cleaning needs while offering enhanced capabilities for nitric or citric acid passivation processes."

Visitors to Booth #338744 at IMTS 2024 will have the opportunity to witness firsthand how the Aquarius Series can optimize their cleaning operations, offering a versatile and cost-effective solution.
